

## National Marine Geospatial Working Group

### 25 June 19 – Agenda

[Draft pending approval from BEIS & Policy Lab]

#### NMGWG Strategic Outcomes:

1. Provide an evidence base and recommendations to the Geospatial Commission for consideration with regards to the National Geospatial Strategy.
2. For the group to outline and evolve into a future entity to enable a desired level of partnering.
3. Enable bilateral quick wins to be identified and acted upon.

Facilitator: Chris Parry

Time	Title	Output	So that....
1330	Coffee / Admin		
1400	Introduction	An understanding of today and the project	Introductions made, and we know why we are here!
1415	Hopes and fears for the future	What does good and bad look like in 2030 for your agency and your outputs?	Get issues on the table – no elephants in the room.
1445	The challenges that we face	What are the policy, technical and governance problems that each organisation is trying to solve? Are these any different for industry and academia?	We know the details
1530	Levels of Collaboration	Are these challenges generic or specific and how much collaboration is needed to resolve them	Are these problems for individual organisations or ones we are all facing
1600	Themes of activity	What are the themes of activity (e.g. Autonomy, collection, standards)	We have a way of describing the complexities.
1615	What projects and policies already exist?	An outline of the policies, strategies and activities which are already addressing some of the themes and challenges?	So we don't replicate or reinvent wheels.
1630	Next Steps / outputs	What are the next steps to deliver outputs and continued level of interaction	Making sure that the next steps are defined and understood
1700	Finish	Depart for evening reception
